Auto Parts Recycler

Introduction

1

39 Years Experience

Industry Overview

2

What is Automotive Parts Recycling?

The process of disassembling unwanted vehicles in order to recover useable auto parts to repair vehicles at affordable prices.

Operational Details

3

I will be operating under an Illinois Auto Recycler License.

- Sourcing of Vehicles
- Dismantling Process
- Storage
- Shell Disposal
- Resale of Parts

Sourcing of Vehicles

- Purchase 1-2 vehicles per week
- Reputable auto auctions and partnerships

Dismantling Process

- Within the designated indoor facility
- One at a time
- Adherence to all environmental and safety regulations

ALL dismantling will be done indoors, with only 2-3 cars indoors during this phase.

Organized Storage

- Tagged
- Organized
- Indoor storage

There will be NO long term outdoor storage of vehicles.

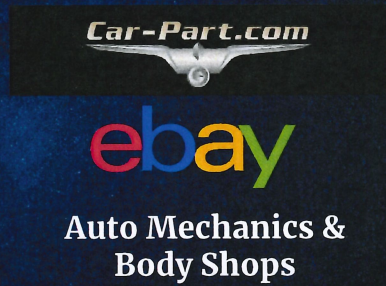

Shell Disposal

Responsibly transported to a licensed scrap yard for proper recycling

Resale of Parts

- Online platforms
- Retail sales
- Partnerships with local body shops and service centers
